Student Feedback 2019-20

Purpose

The purpose of the survey was to investigate how students perceive the services and amenities they were offered at college and how satisfied they were with them.

Design/Methodology/Approach

Questionnaires were handed out to 211 students after their classes. In order to collect students' feedback it was decided not to use an already existing questionnaire but to develop a new measurement tool based on Likert scale.

Data collection- Data was collected from 211 students. The data collection process was convenient for students as they were able to fill in the questionnaires after the lectures.

Description of sample- The students belonged to Arts, Commerce and Science streams. 54.50% of the participants were female, which resembles the gender distribution at the college.

Description of measurement tool- The questionnaire uses Likert scale to measure 26 dimensions of satisfaction level of students at the institutional level. The 5 points Like Scale used to measure the satisfaction level is shown below:

Options	Excellent	Good	Average	Poor	Very Poor

Descriptive statistics

Table 4 shows that students were particularly satisfied with the following quality dimensions ($M < 3$ in the study). Standard deviation values are between $SD = .948$ and $SD = 3.001$, which is normal for scales with 5 response categories. The standard deviation is relatively low for “Completion of Syllabus on time” in the study.* The standard deviation is relatively high for “Wi-Fi facilities” in the study.*

Parents Feedback Analysis 2019-20

Background: The parent survey was designed to meet the requirements of the Education Accountability and the Parental Involvement in the main stream of higher education. The parent survey contains items regarding parent perceptions of the learning environment in the college, home and college relations, and the social and physical environment of the college, infrastructural facilities. The parents of students all under graduate and post graduates were surveyed

Methodology

The design and sampling methodology for the parent survey were established in July 2019. To maintain complete anonymity and to maximize the return rate, the College recommended that the survey should be mailed to a sample of parents along with a postage paid, return envelope. While the sampling methodology proposed by the College was implemented, the parent survey has never been mailed to parents due to budgetary restrictions. Instead, College gave the responsibility to teachers for distributing and collecting the forms. Generally, College sent the survey forms home with students. Sometime College held parent meetings or special meetings at college during which the surveys were distributed. The parents of students all under graduate and post graduates were surveyed. A Committee consisting coordinator, with a team of 8 professors designated by the principal distributed and collected the parent surveys at each class according to instructions provided by Principal.

Survey Responses: In the session 2019-20 the number of parent surveys completed and returned totalled 32. An analysis of the respondents parent survey concluded that the survey responses typically overrepresented the perceptions of parents.

Survey Contain Items : The results of parent survey demonstrate that parent satisfaction levels with the following characteristics.

Table 2: Descriptive Statistics

Table 2 shows that parents were particularly satisfied with the following quality dimensions ($M \leq 2.5$ in the study). Standard deviation values are between $SD=0.837$ and $SD=1.413$, which is normal for scales with 5 response categories. Interestingly, the standard deviation is relatively low for “Satisfaction with Sports and Cultural facilities.*” the standard deviation is relatively high for “Satisfaction with library facilities*.”

Areas of Satisfaction ($M \leq 2.5$ in the study)	Areas of Dissatisfaction ($M \geq 2.5$ in the study)
1. Admission Process	1. Infrastructure
2. Laboratory Facility	2. College Administration
3. Canteen Facility	3. Students Discipline
4. Library Facility	4. Wi-Fi Facility

Concluding Statement

The results of study supports to identify the major issues for the maintainance of quality standards in special respect to higher education. Parents' satisfaction with their institute is based on a relatively stable person-environment relationship. Thus, the satisfaction of Parents seems to reflect quite well perceived quality differences of offered services and of the wider environment.

This report focused on the issue of service quality and Parents' satisfaction in higher education by applying a five points Likert scale, it has hopefully opened up an area of research and methodology that could reap considerable further benefits for researchers interested in this topic.

Parents Feedback Analysis Report 2018-19

Background:

The parent survey was designed to meet the requirements of the Education Accountability and the Parental Involvement in the main stream of higher education. The parent survey contains items regarding parent perceptions of the learning environment in the college, home and collegereations, and the social and physical environment of the college, infrastructural facilities. The parents of students all under graduate and post graduates were surveyed

Methodology

The design and sampling methodology for the parent survey were established in Feb 2019. To maintain complete anonymity and to maximize the return rate, the College recommended that the survey should be mailed to a sample of parents along with a postage paid, return envelope. While the sampling methodology proposed by the College was implemented, the parent survey has never been mailed to parents due to budgetary restrictions. Instead, College gave the responsibility to teachers for distributing and collecting the forms. Generally, College sent the survey forms home with students. Sometime College held parent meetings or special meetings at college during which the surveys were distributed. The parents of students all under graduate and post graduates were surveyed. A Committee consisting coordinator, with a team of 8 professors designated by the principal distributed and collected the parent surveys at each class according to instructions provided by Principal.

Survey Responses: In the session 2018-19 the number of parent surveys completed and returned totalled 65. An analysis of the respondents parent survey concluded that the survey responses typically overrepresented the perceptions of parents.

Survey Contain Items : The results of parent survey demonstrate that parent satisfaction levels with the following characteristics.

Table 2: Descriptive Statistics

Table 2 shows that parents were particularly satisfied with the following quality dimensions ($M \leq 2.5$ in the study). Standard deviation values are between $SD=0.755$ and $SD=1.266$, which is normal for scales with 5 response categories. Interestingly, the standard deviation is relatively low for “Laboratory facilities.* the standard deviation is relatively high for “Wifi facility*.”

Pie Charts: Finally, responses of parents regarding 18 quality dimensions on 5 points likert scale are shown through Pie charts, to identify comparative magnitude of satisfaction level. The same also have been shown in frequency table.

Concluding Statement

The results of study supports to identify the major issues for the maintenance of quality standards in special respect to higher education. Parents' satisfaction with their institute is based on a relatively stable person-environment relationship. Thus, the satisfaction of Parents seems to reflect quite well perceived quality differences of offered services and of the wider environment.

This report focused on the issue of service quality and Parents' satisfaction in higher education by applying a five points Likert scale, it has hopefully opened up an area of research and methodology that could reap considerable further benefits for researchers interested in this topic.
